Subject: Bare Cove - please share with Planning Board and Zoning Board of Appeals

Hello,

I am writing in regards to the town of Hingham's proposal to take the public lands of Bare cove and remove much of the woods to erect a senior center and parking lot. I am opposed to the town taking this rare wild public land space for this use. There are many properties in the town of Hingham along route 3 that are underutilized that are not wild spaces.

I travel to Hingham several times a year and bike, run and walk in that park. Every time we visit there are many walkers and families enjoying this natural setting in a congested area. Looking at the cove and the Great Esker Park across the water is a rare swath of nature next to Route 3 and the very congested part of the south shore that is Hingham.

This land is secured for use by the public, not just the town of Hingham. If you decide to cut down these woods we, the people and future generations of Hingham, will lose the sanctuary that many people and animals love.

I am sure that the town can find a more suitable spot for a Senior Center and I encourage you to look for one as it is also important to provide for the senior community.
